Mammal

Bats are mammals because they are born alive and have fur. They are the only mammals that can fly.

Copyright © 2016 A Dab of Blue Will Do

Predator

An animal that hunts for a smaller, weaker animal. Owls and hawks are examples of a bat's predators.

Copyright © 2016 A Dab of Blue Will Do

Colony

Bats live together in a colony with up to 1,000 other bats.

Copyright © 2016 A Dab of Blue Will Do

Echolocation

Bats use echolocation to see where they are going at night and find food. They make noises and wait for the sound to come back. This lets them know how close they are from objects or other bats.

Copyright © 2016 A Dab of Blue Will Do

Nocturnal

Bats are nocturnal which means that they are most active at night.

Copyright © 2016 A Dab of Blue Will Do

Bats

Bats live in a colony with up to 1,000 other bats.

Bats are nocturnal. They are awake during the night.

Bats can see in the night by using echolocation.

Bats hang upside down when they sleep. This is called roosting.

Copyright © 2016 A Dab of Blue Will Do
