TEACHER GUIDE
for **NEEDS & WANTS**

NEEDS AND WANTS

- Needs and wants are part of an economy. An economy is the system of how a group of people, a city/town, or a country spends, makes, and uses money and goods and services.
- Needs are things that people must have in order to survive. Food, air, shelter, water, and clothing are all needs. Human bodies need air, food, and water or they won't be able to function and will die. Shelter and clothing are just as important to keep a person safe and protected.
- A want is something a person would like to have but that isn't essential for survival. Wants can include toys, cars, electronics, technology, pets, etc.
- Wants, and many needs, must be purchased with money. It is important for a person to plan out how they spend their money so that they have enough money to pay for their needs before buying any wants.
- A budget is a plan for how a person will spend their money that can help them make sure they don't use up their money on wants before buying their needs.
